

Experiment 27

After modifying a file in a cloned repository, commit the changes locally and push them to GitHub.

Tasks:

- Clone a repository (from question 1).
- Modify a file (e.g., README.md).
- Stage the changes with git add.
- Commit the changes with git commit -m "Updated README".
- Push the changes to GitHub using git push.

Step 1: Open the GitHub repository

1. Open GitHub.
2. Open the repository that you cloned in **Question 1**.
3. Click the **Code** button.
4. Select **HTTPS**.
5. Copy the repository URL.

<https://github.com/aktchaya02/Github-Collaboration-Lab-1.git>

Step 2: Open VS Code

1. Open **Visual Studio Code**.
2. Go to:
File → Open Folder
3. Select the folder where you want to clone the repository.
4. Then open:
Terminal → New Terminal

5. You should see something like:

PS C:\Users\YourName>

Step 3: Clone the repository

1. In the VS Code terminal, type:

```
git clone https://github.com/aktchaya02/Github-Collaboration-Lab-1.git
```

2. Press **Enter**.
3. You should see something similar to:

Cloning into 'my-repository'...

remote: Enumerating objects...

remote: Counting objects...

Receiving objects...

Resolving deltas...

```
PROBLEMS  OUTPUT  DEBUG CONSOLE  TERMINAL  PORTS

PS C:\AKTCHAYA A> git clone https://github.com/aktchaya02/Github-Collaboration-Lab-1.git
Cloning into 'Github-Collaboration-Lab-1'...
remote: Enumerating objects: 7, done.
remote: Counting objects: 100% (7/7), done.
remote: Compressing objects: 100% (4/4), done.
remote: Total 7 (delta 0), reused 3 (delta 0), pack-reused 0 (from 0)
Receiving objects: 100% (7/7), done.
```

Step 4: Open the cloned repository

1. Move into the repository:
`cd Github-Collaboration-Lab-1`
2. You can check the files using:
`dir`
3. You should see files such as:
`README.md`

```
PS C:\AKTCHAYA A> cd Github-Collaboration-Lab-1
PS C:\AKTCHAYA A\Github-Collaboration-Lab-1> dir
```

```
Directory: C:\AKTCHAYA
A\Github-Collaboration-Lab-1
```

```
Mode                LastWriteTime
----                -
-a-----         12-08-2026     21:26
```

Step 5: Open README.md

1. In VS Code's **Explorer** on the left side, find:

`README.md`

2. Click it.
3. Add some content to the README.

`## Git and GitHub Experiment`

This repository demonstrates modifying,
committing, and pushing changes using Git.

4. Save the file

Step 6: Check the changed file

1. Open the terminal and type:
`git status`
2. You should see something similar to:
On branch main
Changes not staged for commit:
modified: README.md

```
PS C:\AKTgit status
On branch main
Your branch is up to date with 'origin/main'.

Changes not staged for commit:
  (use "git add <file>..." to update what will be committed)
  (use "git restore <file>..." to discard changes in working directory)
    modified:   README.md

no changes added to commit (use "git add" and/or "git commit -a")
```

Step 7: Stage the changes

1. Now use:
`git add README.md`
2. Then check:
`git status`
3. You should now see:
Changes to be committed:
modified: README.md

```
PS C:\AKTCHAYA A\Github-Collaboration-Lab-1> git add README.md
PS C:\AKTCHAYA A\Github-Collaboration-Lab-1> git status
On branch main
Your branch is up to date with 'origin/main'.

Changes to be committed:
  (use "git restore --staged <file>..." to unstage)
    modified:   README.md
```

Step 8: Commit the changes

1. Now execute the command given in your question:
`git commit -m "Updated README"`
2. You should see something similar to:
[main abc1234] Updated README

1 file changed, 3 insertions(+)

```
PS C:\AKTCHAYA A\Github-Collaboration-Lab-1> git commit -m "Updated README"
[main f42d4bb] Updated README
1 file changed, 6 insertions(+), 1 deletion(-)
```

Step 9: Push the commit to GitHub

1. Now execute:

`git push`

2. After successful push, you should see something similar to:

Enumerating objects...

Counting objects...

Writing objects...

To <https://github.com/username/my-repository.git>

abc1234..def5678 main -> main

```
PS C:\AKTCHAYA A\Github-Collaboration-Lab-1> git push
Enumerating objects: 5, done.
Counting objects: 100% (5/5), done.
Delta compression using up to 12 threads
Compressing objects: 100% (2/2), done.
Writing objects: 100% (3/3), 383 bytes | 383.00 KiB/s, done.
Total 3 (delta 1), reused 0 (delta 0), pack-reused 0 (from 0)
remote: Resolving deltas: 100% (1/1), completed with 1 local object.
To https://github.com/aktchaya02/Github-Collaboration-Lab-1.git
8e34320..f42d4bb main -> main
```

Step 10: Verify the changes on GitHub

1. Go back to your GitHub repository and **refresh the page**.
2. Open:
 README.md
3. You should now see the content you added in VS Code.
4. You can also click **Commits** and see:
5. Updated README
